#### **ADDITIONAL MATERIALS**

You may require a calculator and a ruler.

#### **INSTRUCTIONS TO CANDIDATES**

Use black ink or black ball-point pen. Do not use gel pen or correction fluid.

Write your name, centre number and candidate number in the spaces at the top of this page. Answer **all** questions.

Write your answers in the spaces provided in this booklet. If you run out of space, use the additional page(s) at the back of the booklet, taking care to number the question(s) correctly.

#### **INFORMATION FOR CANDIDATES**

The number of marks is given in brackets at the end of each question or part-question.

You are reminded of the necessity for good English and orderly presentation in your answers. Assessment will take into account the quality of written communication used in your answers.

The psychologists correlated the results for participants to see if there was a relationship between concern about climate change and recycling behaviour.

Results are displayed in the diagram below (Figure 1).

Figure 1: A correlation of concern about climate change and recycling behaviour

(i)	State the strength <b>and</b> direction of the correlation displayed in this research.	[2]
(ii)	Using the data from the diagram (Figure 1), describe <b>one</b> conclusion about the ratings for concern compared to the number of items recycled.	[3]

8. A group of researchers aimed to find out whether people begin to believe fake news when it is repeated. The researchers asked participants to read news articles, over a five-week period, and rate how much they believed each article to be true (on a scale of 1–10) after each session. Articles of fake news were repeated in every other week. They compared the ratings from the start and end of the research to see the influence of repetition.

The results can be seen in the table below.

Figure 3: Table to show ratings of belief (1-10) for the fake news article at the start and the end of the study.

Participant	Rating at start of research	Rating at end of research
А	3	4
В	5	10
С	2	4
D	1	3
E	1	5
F	3	6
G	3	6

(1)	Calculate the median rating for the start of the research. Show your workings.	[2]
•		
•••••		······
(ii)	Calculate the mean rating for the end of the research. Show your workings.	[2]

(a)
