# GCSE **PSYCHOLOGY**

Paper 1 Cognition and Behaviour

Friday 19 May 2023

Afternoon

### Time allowed: 1 hour 45 minutes

#### Materials

For this paper you may use:

a calculator.

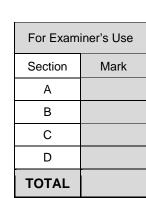

#### Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer all questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.

#### Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 100.
- Question 18 is a synoptic question in which you will be rewarded for your ability to draw together different areas of knowledge and understanding from across the full course of study.
- Questions should be answered in continuous prose. You will be assessed on your ability to:
  - use good English
  - organise information clearly
  - use specialist vocabulary where appropriate.

#### Read the following article.

1 0

In a study investigating perceptual set, 40 participants were asked to place their hand in a bucket of water for 10 seconds whilst listening to music. The temperature of the water was the same for each participant.

They were asked to give a number between 1 and 50 to report how warm they thought the water was.

A score of 1 meant the water felt extremely cold. A score of 50 meant that the water felt extremely hot.

There were two conditions of the experiment. All participants completed both conditions.

In **Condition A**, participants listened to a famous song that is associated with winter and Christmas.

In **Condition B**, participants listened to a famous song that is associated with summer and the sunshine.

#### Question 10 continues on the next page

2 1	Read the following information.	outside the box
	In a sixth form centre, students have independent study lessons as well as subject lessons.	
	Students use the sixth form learning area during their independent study lessons. They are expected to use their study lessons to finish work related to their subjects.	
	Teachers are concerned that some students spend more time chatting to friends than finishing work during study lessons. A researcher is asked to investigate how students are using study lessons.	
	The researcher asked 30 students to fill in a questionnaire about how they spend their study lessons. They selected participants using stratified sampling.	
2 1.1	Explain <b>one</b> weakness of using a stratified sample when conducting research. [2 marks]

## **21. 3** Participants were also asked to estimate the amount of time they spent working and chatting to friends during a typical 70 minute study lesson.

The mean estimates for 30 participants are shown in Table 3.

**Table 3** Mean estimated amount of time spent working and chatting to friends during a typical 70 minute study lesson for 30 participants.

Activity	Mean estimated time (in minutes)
Time spent <b>working</b> during a typical 70 minute study lesson.	60
Time spent <b>chatting to friends</b> during a typical 70 minute study lesson.	10

What is the ratio of time spent working compared to time spent chatting to friends?

Write this ratio in its simplest form.

[2 marks]

Answer

Do not write outside the

box

### **2 1**. **4** Read the following information.

The researcher wanted to find out more about the **types of learning activity** happening during study lessons. They decided to observe the actual behaviour of the same participants during study lessons. They worked with an assistant using CCTV camera recordings of the sixth form learning area during study lessons. They used recordings taken over the past two days.

Identify **two** ethical issues that researchers should consider in observation studies. [2 marks]

Ethical issue 1

Ethical issue 2\_\_\_\_\_

Question 21 continues on the next page

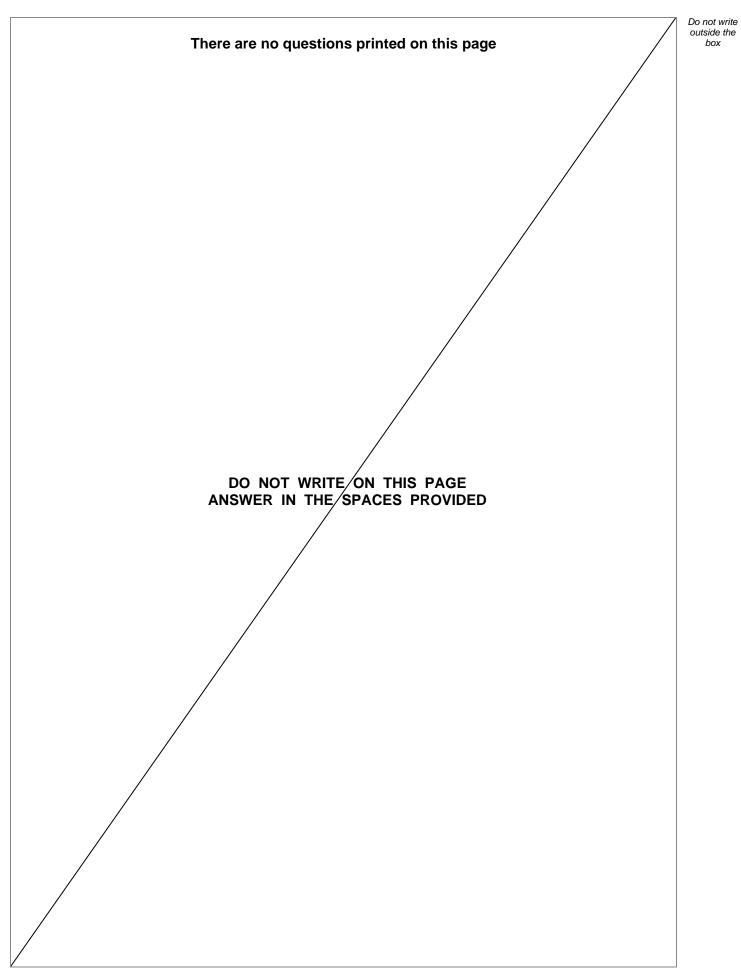

Sketch a <b>frequency table</b> the researcher and their assistant can use to colle information about the types of learning activity participants do during study le Include <b>two</b> categories of behaviour about <b>types of learning activity</b> in your frequency table	
frequency table.	r
Do not include 'chatting to friends' and 'completing work' as categories of be	haviour. <b>[4 marks]</b>
The psychologist and their assistant had high interobserver reliability in their observation study.	
Define what is meant by 'interobserver reliability' in observational research.	[2 marks]
	The psychologist and their assistant had high interobserver reliability in their observation study.
